Test the coding

```
print("hello world~!")
```

Test the LaTeX - Copied from the assignment guideline

$$J(\theta) = \frac{1}{2m} \sum_{i=1}^m (h\theta(x(i)) - y(i))^2$$

$$J(\theta) = \frac{1}{2m} \sum_{i=1}^m (h\theta(x(i)) - y(i))^2$$
